

Baking Parchment (siliconised)

KONOS range of baking paper comprises baking parchment sheets and rolls. The sheet packs are supplied with measuring from 25 cm to 38 cm width x up to 42 cm length; the rolls measures from 38 cm width x lengths from 6 m to 10 m. These sizes can readily be adapted to meet individual requirements.

KONOS baking sheets are presented in a convenient and recloseable dispenser-carton from which the sheets can be removed one by one; the rolls are available in a recloseable dispenser-carton with a cutting edge or blade for easy tearing at required lengths. An inner and outer printed carton is an additional advertising space.

The standard weight of our baking paper is specified to 40 g/m² in white and natural brown paper qualities. Should a different weight or FSC / PEFC certified baking paper be required, a relevant choice of complementary alternatives is readily available.

The baking paper is siliconised, non-stick on both sides and is perfectly suited for use in an oven or microwave up to 220 °C.

HINT: KONOS baking paper also can be used when steam cooking, for handicraft or for wrapping household articles.

Standard specifications for baking paper:

Size	Quality	Packaging Option
Sheets from 25 to 38 x 42 cm	40 g/m ² white or natural brown non-stick quality parchment (siliconised)	from 18 to 30 sheets packed in a reclosable dispenser box with 5 flaps optional with 3 flaps
