

Basket Coffee Filter Papers (A-CUP or URN)

KONOS A-CUP basket coffee filter papers are already the largest selling range of basket filters in Europe and increasingly popular throughout the world. Also we have the world's widest range of URN-sized coffee filter papers. A complete range of sizes is available, to fit all small, medium and large catering coffee brewing machines (5 litres - 70 litres). Basket coffee filter papers can be packaged to suit customers' individual needs, including bulk supply for repackaging with coffee or other products, or in special packs suitable for Cash & Carry or retail displays. Own-brand packaging design is possible. An inner and outer printed carton is an additional advertising space.

We offer a choice of paper weights, critically significant to the performance of the larger sizes (URN). This can vary from country to country with different consumer preferences in coffee grind grade, coarse or smooth. Basket filters are available in all major sizes from 200 mm to 845 mm diameter, in white or natural brown quality paper.

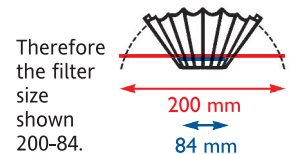

The paper used for our basket coffee filters is pure-grade paper, made at the company's paper-mill at Netstal, in Switzerland, free from all environmental pollutants. All our white paper is made from ECF or TCF-bleached pulp; all pulp, bleached and unbleached, is supplied from certified, sustainable forestry operations. Only wood-free virgin pulp is used for our paper without any recycled content. Our basket coffee filter paper conforms to all food legislation (EG 1935/2004, LFGB, BfR XXXVI) and to the requirements of the U.S. Food and Drug Administration (FDA). The resultant base paper is regularly tested by an independent laboratory, ISEGA, to whose safety standards it conforms. The quality of all our basket coffee filter papers is subject to defined and regularly monitored standards conforming to DIN EN ISO 9001.

Standard specifications for basket coffee filter papers:

Size	Quality	Packaging Option
250 - 84 mm	39 g/m ² bleached or unbleached	Polybag with content of 250 filter and packed in an outer carton special packaging on request
